Attn: Mr. Bob Strong

Semi-Annual Ground-Water Monitoring
Alaska Marine Lines
7100 Second Avenue and 5615 West Marginal Way Facilities
Seattle, Washington

Dear Mr. Strong:

This letter transmits Dames & Moore's proposal to perform Semi-Annual Ground-Water Monitoring services at the above-referenced facilities.

I have telephoned Mr. John Storman at the Washington Department of Ecology (Ecology) regarding the recent submittal of our reports on the subsurface investigations conducted at the 7100 Second Avenue facility. He informed me that he will review these documents within the following weeks and will call to inform me regarding Ecology's acceptance of our recommendations.

Dames & Moore appreciates the opportunity to provide this service to you. If you have any questions or require additional assistance, please feel free to contact us.

Yours very truly,

DAMES & MOORE, INC.
